We are a fully integrated and highly proficient dyeing and finishing enterprise, seamlessly combining dyeing, a state-of-the-art scientific research center, processing, and molding. Our impressive design capacity exceeds 40,000 tons, enabling us to cater to a wide range of requirements and demands.

Our product portfolio encompasses an array of premium offerings, including the all-polyester series, cotton series, CVC blended series, TC blended series, cotton sweatshirt brushed series, and various other meticulously crafted blended materials.

At present, our factory boasts an impressive array of advanced and environmentally conscious production facilities. We have 50 cutting-edge front-end production lines that exemplify energy efficiency and sustainability. Additionally, we have 14 high-performing finishing production lines that add finesse to our products, along with a substantial fleet of 100 weaving production lines.

Our company operates a highly efficient wastewater treatment and purification system with a daily capacity of 4,500 tons.

Ningbo Jinlin prides itself on possessing a team of skilled technical experts who consistently deliver high-quality results. We prioritize meeting the unique requirements of both domestic and international customers by designing and implementing scientifically sound and rational knitting fabric processing technology.
